

Launching and Authorizing KARMA MW

KARMA MW is **copy-protected** software. It requires an “authorization” to run on your computer. On Mac, locate and double-click the KARMA MW icon (in the KARMA MW folder installed by the Installer). On Windows, choose the KARMA MW shortcut on the desktop. The first time you launch the application several dialogs will appear, taking you through the authorization process.

Mac Authorization Dialog

Windows Authorization Dialog

1. Generating your “Challenge:”

On the second authorization dialog, a unique code will be created. This code, or “Challenge,” is specific to your machine and installation. A Challenge Code looks something like this *example*:

**ROY SCAM COLA AMEN FIN TRAY POT PAPA AFRO PUG ALPS HID MAKO
BRIM ARTY PALL HOW LET LAIR**

Copy the Challenge onto the clipboard by pressing the “Copy Challenge” button. Locate and open the text file “Registration Form” that was installed on your hard drive (on Windows there will be a shortcut titled “KARMA MW Reg. Form” on your desktop), and **paste the Challenge into it at the bottom** (using the Edit Menu > Paste command). **Fill out the rest of the form**, and then send it as an e-mail to register@karma-lab.com. You can do this by either copying all of the text from the form and pasting it into the e-mail, or including the text file (saved with your entries) as an attachment. (If you don’t have e-mail access, you can fax it to 908-654-1180.) After this, click “Cancel” on the authorization dialog, as you will be unable to run the application until you receive your response.

Note: please make sure you fill out all the required information, including your Karma’s Serial Number. We also need the Registration Number (looks like KMW-XXXXX-XXXXX-XXXX) on the Registration Card that comes in the software box, or was sent to you via e-mail for the download version. Without this information, we cannot process your Response and will simply contact you requesting more information, which will cause more time to pass before you can get started.

2. Receiving your “Response:”

You will receive back, via e-mail (or fax), another code (known as a “Response”). A Response code looks something like this *example*:

CALF PA LORE CANK RUNT PEN PAID APE GUTS OUCH FLOG HOME LOAD
NOSE GET DIN IBIS SICK ORAL BEST UP SAME SINS CAPS JOHN GUNS
DUNE GOLF FURL EXAM MURK OGRE MAYO TONE PROP TAB HALO FLAT
NESS FOOD TOY SAW DUKE

This will generally be received back the same day, sometimes within a few hours. To authorize KARMA MW, you launch it again, go through the same authorization dialogs, and paste (or enter) the Response you received in the area labeled "Response," and click on "Next." You can do this by copying and pasting from your e-mail program, using the Edit Menu, or by manually typing the words exactly as shown. Assuming the code you entered was valid, your software will be authorized and from that point forward, you will not need to deal with the copy protection again (unless you want to install it on a different CPU or hard drive – contact support@karma-lab.com in this case).

Note: If you want to authorize a computer without Internet access:

*Some people have more than one computer; one may be dedicated to music, while the other is dedicated to the Internet and e-mail. In this case, you must install the program on the **music computer**, and get the Challenge Code from **that computer**. Fill out the registration form on that computer, and when finished, move the registration form to the Internet computer (via floppy disk, CDR, CDRW etc.) and then e-mail it to us. When you receive the Response Code back, again you must move it from the Internet computer to the music computer where you can easily cut and paste it into the Authorization Dialog.*

Note: If you have more than one computer:

Each computer you want to run KARMA MW on must be separately authorized. Your license allows the software to be run on a single computer by a single user and a single computer to be authorized. If you need to authorize additional computers, please contact support@karma-lab.com.
